

*Steinbock*

## RIESLING ZERO

The new Alcohol Free from Steinbock Selection Dr. Fischer is made from a fruity Riesling Kabinett from Mosel region.

Using an innovative vacuum distillation process the alcohol is removed.

The atmospheric pressure is reduced to about 15mbar, and in this way the boiling point of the alcohol is lowered from about 78° C (173° F) to about 25-30° C (77-86° F). The delicate aromas of the wine are almost preserved and a beverage with an alcohol by volume lower than 0.25 % is obtained.

This non-alcoholic beverage is low in calories but at the same time it is complex, fresh and lively with a balanced acidity.

*New times – New lifestyles.*

Thanks to  
“Steinbock Alcohol Free”

*you can toast in style even if you can't or don't want to  
drink alcohol and without fear of the breathalyzer.*
